Custom Solutions

JOHANSON
DIELECTRICS 

Your Technology Partner

The mission of the Johanson Companies is to translate our customer needs into quality electronic components, produced in factories that are models of excellence, supported by innovative service. With over 30 years of experience, Johanson Dielectrics provides both standard and custom technology solutions tailored to your specific electronic applications.

Our standard product range includes High Voltage and AC Safety Capacitors providing solutions for Lighting, IT and Business Equipment designs. Our X2Y® Capacitor line provides advanced EMI filtering and IC decoupling solutions and our High Capacitance Tanceram® products provide the highest capacitance values in the smallest cases sizes.

Customized solutions in the areas of High Temperature and High AC power ceramic capacitors are available to customers who require a partnered technology solution.

Johanson Dielectrics design and manufacturing operations are located in Sylmar, California and Zhaoqing, PRC. Our quality minded management system utilizes continuous improvement programs focused on increased product reliability, manufacturing through-put, and product performance. Our broad experience, applications support, and responsive service enhance our ability to drive down your total cost of procurement and speed your time to market.

HIGH FREQUENCY CERAMIC SOLUTIONS

Johanson Technology Inc., Camarillo CA. Products include High Q Capacitors, Ceramic and Wire-wound Chip Inductors, and a broad range of LTCC based RF IPCs such as Antennas, Filters, Baluns, Couplers, Matched Filter Baluns, etc.

Johanson Dielectrics, Inc. reserves the right to make design and price changes without notice. All sales are subject to the terms and conditions printed on the back side of our sales order acknowledgment forms, including a limited warranty and remedies for non-conforming goods or defective goods. We will be pleased to provide a copy of these terms and conditions for your review.

INDEX OF PRODUCTS

SURFACE MOUNT CERAMIC CAPACITORS

| | |
|---|-------|
| Ceramic Capacitor Prototyping Kits | 4-5 |
| High Voltage Capacitors 250 - 6,000 VDC | 6-7 |
| Safety Capacitors 250 VAC, Y2, Y3, Japan Standard | 8-9 |
| Low Inductance X2Y® Capacitors | 10-13 |
| Low Inductance Capacitors | 14 |
| Chip Feedthru Filter Capacitors | 15 |
| High Temperature - 200°C Capacitors | 16-17 |
| High Capacitance Tanceram® Capacitors | 18-19 |
| SMT Multi-layer Ceramic Capacitors 10 - 200 VDC | 20-21 |

LEADED CERAMIC CAPACITORS

| | |
|---|-------|
| SMPS Stacked Capacitors, 125°C & 200°C versions | 22-23 |
| Mini-SMPS Stacked Capacitors | 24-25 |
| Maxi-Cap™ SMPS Capacitors | 26-27 |
| X2Y® Low ESL SMPS Stacked Capacitors | 28-29 |
| Switch-mode Radial Leaded Capacitors | 30-31 |
| High Voltage Radial Leaded Capacitors, 125°C, 200°C, 250°C versions | 32-33 |

PLANAR CAPACITORS & CUSTOM CERAMIC SOLUTIONS

| | |
|---|-------|
| Planar Array Capacitors | 34-35 |
| CapStrate® & Customer Ceramic Solutions | 36-37 |
| Part Number, Dielectric, Packaging Specifications | 38-39 |

ON-LINE PRODUCTS

N2200 Chip Capacitors
200°C Radial Leaded Capacitors
Tin-Lead Termination Capacitors
Polyterm® Termination Capacitors
Large Size MLC Capacitors

CERAMIC CAPACITOR ENGINEERING DESIGN KITS

Johanson Dielectrics, Inc. offers a variety of multi-layer chip capacitor sample kits for proto-type design work. Each kit is grouped by type, size, or voltage and contains a selection of popular values and tolerances. The chips are individually packaged in labeled plastic compartments for easy access. The general range of kit contents is described below. Specific part number details may be found at www.johansondielectrics.com

| 0402 Ceramic Chip Capacitor Kit | | | | | P/N: S-0402 |
|---|------------------|---------------|-----------------------|-------------|-------------|
| 1400 piece sample assortment of selected values from 1.0pF to 0.1 μ F | | | | | |
| Chip Size | Voltage Rating | Dielectric | Capacitance Range | Qty / Value | Total Qty |
| 0402 | 50 VDC - 6.3 VDC | NPO, X7R, Y5V | 1.0pF to 0.22 μ F | 50 pcs | 1400 pcs |

| 0603 Ceramic Chip Capacitor Kit | | | | | P/N: S-0603 |
|---|-----------------|---------------|----------------------|-------------|-------------|
| 1400 piece sample assortment of selected values from 1.0pF to 0.1 μ F | | | | | |
| Chip Size | Voltage Rating | Dielectric | Capacitance Range | Qty / Value | Total Qty |
| 0603 | 50 VDC - 16 VDC | NPO, X7R, Y5V | 10pF to 0.22 μ F | 50 pcs | 1400 pcs |

| 0805 Ceramic Chip Capacitor Kit | | | | | P/N: S-0805 |
|---|------------------|------------|----------------------|-------------|-------------|
| 1400 piece sample assortment of selected values from 1.0pF to 0.1 μ F | | | | | |
| Chip Size | Voltage Rating | Dielectric | Capacitance Range | Qty / Value | Total Qty |
| 0805 | 100 VDC - 16 VDC | NPO, X7R | 10pF to 0.47 μ F | 50 pcs | 1400 pcs |

| TANCERAM® HIGH CAPACITANCE Ceramic Chip Capacitor Kit | | | | | P/N: S-TAN-X5R |
|--|------------------|------------|---------------------------|-------------|----------------|
| 500 piece sample assortment of selected values from 1.0 μ F to 100 μ F | | | | | |
| Chip Size | Voltage Rating | Dielectric | Capacitance Range | Qty / Value | Total Qty |
| 0402, 0603, 0805 1206, 1210 | 25 VDC - 6.3 VDC | X5R | 1.0 μ F - 100 μ F | 10 - 25 pcs | 500 pcs |

| 500 VDC Ceramic Chip Capacitor Kit | | | | | P/N: S-500 |
|---|----------------|------------|---------------------|-------------|------------|
| 400 piece sample assortment of selected values from 33pF to 0.1 μ F | | | | | |
| Chip Size | Voltage Rating | Dielectric | Capacitance Range | Qty / Value | Total Qty |
| 0805 - 1812 | 500 VDC | NPO, X7R | 33pF to 0.1 μ F | 10-20 pcs | 400 pcs |

| 1000 VDC Ceramic Chip Capacitor Kit | | | | | P/N: S-1KV |
|---|----------------|------------|---------------------|-------------|------------|
| 400 piece sample assortment of selected values from 22pF to 0.1 μ F | | | | | |
| Chip Size | Voltage Rating | Dielectric | Capacitance Range | Qty / Value | Total Qty |
| 0805 - 2225 | 1000 VDC | NPO, X7R | 22pF to 0.1 μ F | 10-20 pcs | 400 pcs |

*Johanson may from time-to-time adjust actual kit contents based on design demand trends.

CERAMIC CAPACITOR ENGINEERING DESIGN KITS

| 2000 VDC Ceramic Chip Capacitor Kit | | | | | P/N: S-2KV |
|---|----------------|------------|-------------------|-------------|------------|
| 300 piece sample assortment of selected values from 22pF to 0.022μF | | | | | |
| Chip Size | Voltage Rating | Dielectric | Capacitance Range | Qty / Value | Total Qty |
| 1206 - 2225 | 2000 VDC | NPO, X7R | 22pF to 0.022μF | 10-20 pcs | 300 pcs |

| X2/Y3 SAFETY CERTIFIED Ceramic Chip Capacitor Kit | | | | | P/N: S-SY3 |
|---|-----------------|------------|-------------------|-------------|------------|
| 240 piece sample assortment of selected values from 10pF to 1500 pF | | | | | |
| Chip Size | Voltage Rating | Dielectric | Capacitance Range | Qty / Value | Total Qty |
| 1808 | 3KV DC / 250 AC | NPO, X7R | 10pF to 1500 pF | 20 pcs | 240 pcs |

| X1/Y2 SAFETY CERTIFIED Ceramic Chip Capacitor Kit | | | | | P/N: S-SY2 |
|---|-----------------|------------|-------------------|-------------|------------|
| 200 piece sample assortment of selected values from 10pF to 2200 pF | | | | | |
| Chip Size | Voltage Rating | Dielectric | Capacitance Range | Qty / Value | Total Qty |
| 1808 - 2220 | 5KV DC / 250 AC | NPO, X7R | 10pF to 2200pF | 20 pcs | 200 pcs |

| X2Y® EMI FILTER Capacitor Kit - 0402 Size | | | | | P/N: S-X07CBK |
|---|----------------|------------|-------------------|-------------|---------------|
| 600 piece sample assortment of selected values from 1.0pF to 0.01μF | | | | | |
| Chip Size | Voltage Rating | Dielectric | Capacitance Range | Qty / Value | Total Qty |
| 0402 | 10 - 50 VDC | NPO, X7R | 1.0pF to 0.01μF | 50 pcs | 600 pcs |

| X2Y® EMI FILTER Capacitor Kit - 0603 Size | | | | | P/N: S-X14CBK |
|---|----------------|------------|-------------------|-------------|---------------|
| 700 piece sample assortment of selected values from 1.0pF to 0.01μF | | | | | |
| Chip Size | Voltage Rating | Dielectric | Capacitance Range | Qty / Value | Total Qty |
| 0603 | 50 - 100 VDC | NPO, X7R | 1.0pF to 0.01μF | 50 pcs | 700 pcs |

| X2Y® POWER BYPASS Capacitor Kit - 0603 Size | | | | | P/N: S-X14-PBP |
|--|----------------|------------|-------------------|-------------|----------------|
| 300 piece sample assortment of selected values from 1.0nF to 1.0μF | | | | | |
| Chip Size | Voltage Rating | Dielectric | Capacitance Range | Qty / Value | Total Qty |
| 0603 | 6.3 - 100 VDC | X7R, X5R | 1.0nF to 1.0μF | 20 pcs | 300 pcs |

| X2Y® EMI FILTER Capacitor Kit - 0805 Size | | | | | P/N: S-X15-EMI |
|---|----------------|------------|-------------------|-------------|----------------|
| 300 piece sample assortment of selected values from 1.0pF to 0.01μF | | | | | |
| Chip Size | Voltage Rating | Dielectric | Capacitance Range | Qty / Value | Total Qty |
| 0805 | 50 - 100 VDC | NPO, X7R | 1.0pF to 0.01μF | 20 pcs | 300 pcs |

| X2Y® DC MOTOR FILTER Capacitor Kit | | | | | P/N: S-X2Y-MTR |
|--|----------------|------------|-------------------|-------------|----------------|
| 300 piece sample assortment of selected values from 0.10μF to 0.47μF | | | | | |
| Chip Size | Voltage Rating | Dielectric | Capacitance Range | Qty / Value | Total Qty |
| 1206 - 1812 | 100 VDC | X7R | 0.10μF to 0.47μF | 30 pcs | 300 pcs |

High Voltage Surface Mount MLCCs 250 - 6,000 VDC

These high voltage capacitors feature a special internal electrode design which reduces voltage concentrations by distributing voltage gradients throughout the entire capacitor.

This unique design also affords increased capacitance values in a given case size and voltage rating. The capacitors are designed and manufactured to the general requirement of EIA198 and are subjected to a 100% electrical testing making them well suited for a wide variety of telecommunication, commercial, and industrial applications.

APPLICATIONS

- Analog & Digital Modems
- LAN/WAN Interface
- Lighting Ballast Circuits
- Voltage Multipliers
- DC-DC Converters
- Back-lighting Inverters

Polyterm® soft termination option for demanding environments & processes available on select parts, please contact the factory.

Available cap. values include these significant retma values and their multiples: 1.0 1.2 1.5 1.8 2.2 2.7 3.3 3.9 4.7 5.6 6.8 8.2
(1.0 = 1.0, 10, 100, 1000, etc.) Consult factory for non-retma values and sizes or voltages not shown.

ELECTRICAL CHARACTERISTICS

Meets the standard NPO & X7R dielectric specifications listed on page 35

DIELECTRIC WITHSTANDING VOLTAGE DWV = 1.5 X rated WVDC for ratings 500-999 WVDC,
DWV = 1.2 X rated WVDC for ratings ≥ 1,000 WVDC

NOTE: Capacitors may require a surface coating to prevent external arcing. Solder mask should not be used beneath capacitors. For more information see JDI Tech Note "Surface Arc Season"

Johanson Dielectrics Type SC ceramic chip capacitors are designed for AC voltage surge and lightning protection in line-to-ground interface applications in computer networks, modem, facsimile and other equipment.

Johanson's safety capacitor offering includes four different case sizes and NPO and X7R dielectric materials.

These devices are surface mount ready with barrier terminations and tape and reel packaging.

Information on capacitor safety ratings and certification details may be found below.

Polyterm® soft termination option for demanding environments & processes available on select parts, please contact the factory.

X Capacitors are defined as suitable for use in situations where failure of the capacitor would not lead to danger of electric shock.

Y Capacitors are defined as suitable for use in situations where failure of the capacitor could lead to danger of electric shock.

X2Y® FILTER & DECOUPLING CAPACITORS

X2Y® filter capacitors employ a unique, patented low inductance design featuring two balanced capacitors that are immune to temperature, voltage and aging performance differences. These components offer superior decoupling and EMI filtering performance, virtually eliminate parasitics, and can replace multiple capacitors and inductors saving board space and reducing assembly costs.

ADVANTAGES

- One device for EMI suppression or decoupling
- Replace up to 7 components with one X2Y
- Differential and common mode attenuation
- Matched capacitance line to ground, both lines
- Low inductance due to cancellation effect

APPLICATIONS

- Amplifier Filter & Decoupling
- High Speed Data Filtering
- EMC I/O Filtering
- FPGA / ASIC / μ -P Decoupling
- DDR Memory Decoupling

X2Y® FILTER & DECOUPLING CAPACITORS

THE X2Y® DESIGN - A BALANCED, LOW ESL, "CAPACITOR CIRCUIT"

The X2Y® capacitor design starts with standard 2 terminal MLC capacitor's opposing electrode sets, A & B, and adds a third electrode set (G) which surround each A & B electrode. The result is a highly versatile three node capacitive circuit containing two tightly matched, low inductance capacitors in a compact, four-terminal SMT chip.

EMI FILTERING:

The X2Y® component contains two shunt or "line-to-ground" Y capacitors. Ultra-low ESL (equivalent series inductance) and tightly matched inductance of these capacitors provides unequalled high frequency Common-Mode noise filtering with low noise mode conversion. X2Y® components reduce EMI emissions far better than unbalanced discrete shunt capacitors or series inductive filters. Differential signal loss is determined by the cut off frequency of the single line-to-ground (Y) capacitor value of an X2Y®.

POWER BYPASS / DECOUPLING

For Power Bypass applications, X2Ys® two "Y" capacitors are connected in parallel. This doubles the total capacitance and reduces their mounted inductance by 80% or 1/5th the mounted inductance of similar sized MLC capacitors enabling high-performance bypass networks with far fewer components and vias. Low ESL delivers improved High Frequency performance into the GHz range.

GSM RFI ATTENUATION IN AUDIO & ANALOG

GSM handsets transmit in the 850 and 1850 MHz bands using a TDMA pulse rate of 217Hz. These signals cause the GSM buzz heard in a wide range of audio products from headphones to concert hall PA systems or "silent" signal errors created in medical, industrial process control, and security applications. Testing was conducted where an 840MHz GSM handset signal was delivered to the inputs of three different amplifier test circuit configurations shown below whose outputs were measured on a HF spectrum analyzer.

- 1) No input filter, 2 discrete MLC 100nF power bypass caps.
- 2) 2 discrete MLC 1nF input filter, 2 discrete MLC 100nF power bypass caps.
- 3) A single X2Y 1nF input filter, a single X2Y 100nF power bypass cap.

X2Y configuration provided a nearly flat response above the ambient and up to 10 dB improved rejection than the conventional MLCC configuration.

AMPLIFIER INPUT FILTER EXAMPLE

In this example, a single Johanson X2Y® component was used to filter noise at the input of a DC instrumentation amplifier. This reduced component count by 3-to-1 and costs by over 70% vs. conventional filter components that included 1% film Y-capacitors.

| Parameter | X2Y® 10nF | Discrete 10nF, 2 @ 220 pF | Comments |
|-----------------------|---------------|------------------------------|-------------------|
| DC offset shift | < 0.1 μ V | < 0.1 μ V | Referred to input |
| Common mode rejection | 91 dB | 92 dB | |

X2Y® FILTER & DECOUPLING CAPACITORS

COMMON MODE CHOKE REPLACEMENT

- Superior High Frequency Emissions Reduction
- Smaller Sizes, Lighter Weight
- No Current Limitation
- Vibration Resistant
- No Saturation Concerns

See our website for a detailed application note with component test comparisons and circuit emissions measurements.

Measured Common Mode Rejection

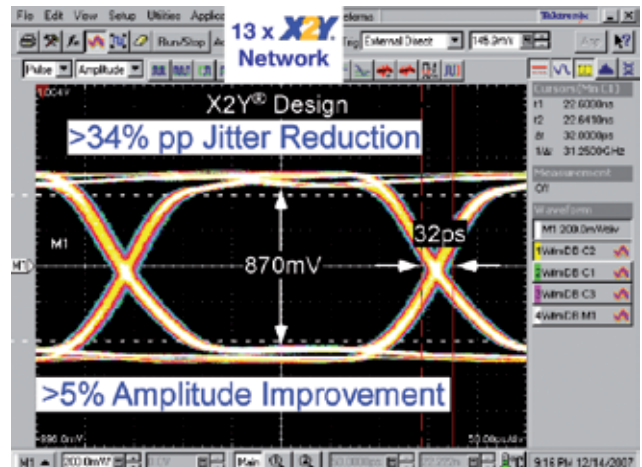

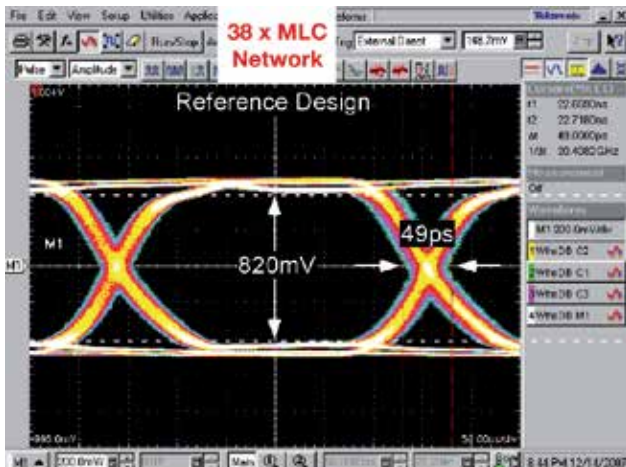

PARALLEL CAPACITOR SOLUTION

A common design practice is to parallel decade capacitance values to extend the high frequency performance of the filter network. This causes an unintended and often over-looked effect of anti-resonant peaks in the filter networks combined impedance. X2Y's very low mounted inductance allows designers to use a single, higher value part and completely avoid the anti-resonance problem. The impedance graph on right shows the combined mounted impedance of a 1nF, 10nF & 100nF 0402 MLC in parallel in RED. The MLC networks anti-resonance peaks are nearly 10 times the desired impedance. A 100nF and 47nF X2Y are plotted in BLUE and GREEN. (The total capacitance of X2Y (Circuit 2) is twice the value, or 200nF and 98nF in this example.) The single X2Y is clearly superior to the three paralleled MLCs.

X2Y HIGH PERFORMANCE POWER BYPASS - IMPROVE PERFORMANCE, REDUCE SPACE & VIAS

Actual measured performance of two high performance SerDes FPGA designs demonstrate how a 13 component X2Y bypass network significantly out performs a 38 component MLC network. For more information see http://johansondielectrics.com/pdfs/JDI_X2Y_STXII.pdf

LOW INDUCTANCE CHIP CAPACITORS (LICC)

LICC capacitors are specially designed to exhibit lower inductance by altering the aspect ratio of the terminations. The smaller current loop length results in Equivalent Series Inductance (ESL) that is typically 60% lower than standard MLCs of the same size. This ESL improvement is extremely advantageous in the high frequency power decoupling of high speed digital MPU, FPGA, DSP, etc..

FEATURES

- Low Inductance
- High Series Resonant Frequency
- RoHS Compliant
- Sn-Pb and Polyterm® Termination Options
- Surface Mount
- Small Size

CHIP FILTER / FEED-THRU CAPACITORS

Our Feed-Thru Capacitors provide excellent EMI, I/O & Power Line filtering exhibiting much lower inductance than standard SMT capacitors which results in broader frequency response. These are Precious Metal Electrode (PME) products with higher current ratings than comparable Base Metal Electrode (BME) parts.

FEATURES

- 1 Amp Current Rating
- Low Inductance, High SRF
- Surface Mount Non-polarized
- Sn-Pb and Polyterm® Options

APPLICATIONS

- DC Power Line EMI Filter
- RF Immunity Filter
- RF Amplifier Gain Filter

High Temperature Surface Mount MLCCs 200°C

Johanson's high temperature MLCC series exhibit stable performance across an extended operating temperature range of -55°C to +200°C. Both Class I and Class II parts are available with DC voltage ratings of 50, 100 and 200V satisfying a wide range of demanding applications.

FEATURES

- Stable 200°C Operation
- Compact SMD Chip
- Polyterm® Termination Option
- Sn-Pb Termination Option

APPLICATIONS

- Deep Hole Drilling Electronics
- High Temperature Modules
- Industrial Equipment
- Automotive • Avionics

TANCERAM® chip capacitors can replace tantalum capacitors in many applications and offer several key advantages over traditional tantalums. Because TANCERAM® capacitors exhibit extremely low ESR, equivalent circuit performance can often be achieved using considerably lower capacitance values. Low DC leakage reduces current drain, extending the battery life of portable products. TANCERAM® high DC breakdown voltage ratings offer improved reliability and eliminate large voltage de-rating common when designing with tantalums.

ADVANTAGES

- Low ESR
- Higher Surge Voltage
- Reduced CHIP Size
- Higher Insulation Resistance
- Low DC Leakage
- Non-polarized Devices
- Improved Reliability
- Higher Ripple Current

APPLICATIONS

- Switching Power Supply Smoothing (Input/Output)
- DC/DC Converter Smoothing (Input/Output)
- Backlighting Inverters
- General Digital Circuits

ELECTRICAL CHARACTERISTICS

Please refer to page 39 of the catalog or www.johansondielectrics.com

STACKED SMPS CERAMIC CAPACITORS

Stacked Switch-Mode ceramic capacitors feature large capacitance values and exhibit low ESR (equivalent series resistance) and low ESL (equivalent series inductance) making them well suited for high power and high frequency applications where tantalum or aluminum electrolytic capacitors may not be suitable. The P-Series feature mechanical and pin-out configurations per DSCC 87106 and 88011 drawings while the E-Series feature mechanical and pin-out configurations more common in European design applications.

KEY FEATURES

- P-Series Approved to DSCC Drawings 87106 & 88011 MIL-PRF-49470
- New T-Series 200°C for downhole tools and aircraft engine control applications.
- E-Series Common European Lead Styles available to MIL-PRF-49470 requirements.
- NPO & X7R Dielectrics, 50 to 500 VDC Ratings
- Low ESR / Low ESL, Ideal for SMPS Filtering Applications
- Custom Sizes, Voltages, and Values Available

MINI SWITCH-MODE® CAPACITORS

JDI's Mini Switch-Mode® ceramic capacitors combine the advantages of high capacitance found in tantalum capacitors with very low ESR performance of ceramic capacitors. The “J” and “L” lead configurations replace 1825 and 2225 SMT chips to provide stress relief and prevent cracking due to thermal cycling or mechanical board flexing. Another plus of the J-lead style is that this configuration allows use of the same solder lands as the SMT chips. See the Stacked Switch-Mode section for larger values. See also the Technical Notes on soldering and handling and suggested solder lands.

FEATURES

- High Capacitance, Small Size
- Low ESR/ESL
- Leadframe reduces thermal & mechanical stress due to board flexure and TCE mismatch

APPLICATIONS

- DC-DC Converters
- Power Supply Input & Output Filters

BME MINI SWITCH-MODE® CAPACITORS

This new series of miniature switchmode power supply filter capacitors uses BME (Base Metal Electrode) construction to achieve 300-400% capacitance increases and component size reductions compared to their PME (Precious Metal Electrode) counterparts per the comparison examples below.

BME Size / Capacitance Comparison

| Technology | Chips | Volts | Max. Cap. |
|------------|----------------|-------------|-----------------------------|
| PME | 1x 1825 | 50V | 1.2 μ F |
| BME | 1x 1812 | 50V | 4.7μF |
| PME | 2x 2225 | 100V | 4.4 μ F |
| BME | 2x 2220 | 100V | 22μF |

FEATURES

- High Capacitance, Small Size
- Low ESR/ESL
- Leadframe reduces thermal & mechanical stress due to board flexure and TCE mismatch
- Green / ROHS Compliant

APPLICATIONS

- DC-DC Converters
- Power Supply Input & Output Filters
- High Capacitance Applications Where Increased Reliability is Required

X2Y® SWITCH-MODE CERAMIC CAPACITORS

JDI's new X2Y® Technology Switch-Mode ceramic capacitors exhibit significantly lower ESL making them ideally suited for applications where high frequency filtering performance is critical. Lower ESL performance translates to significant size and weight reduction because lower capacitance values perform as well or better

KEY FEATURES

- Low ESR / Low ESL, Ideal for SMPS Filtering Applications
- Same Package Size as DSCC Drawings 87106 & 88011 MIL-PRF-49470
- NPO & X7R Dielectrics, 50 to 500 VDC Ratings
- Custom Sizes, Voltages, and Values Available

HIGH VOLTAGE RADIAL LEADED CAPACITORS

KEY FEATURES

- Rated Working Voltages from 25 to 5000 VDC
- Rugged Epoxy Coating Offers Increased Protection
- Compact MLC Designs Smaller Than Film or Disc
- NEW 200°C & 250°C Versions Available for Oil & Geophysical Tool, Aircraft Engine Control Applications
- DSCC Drawing & Other Screened Versions Available

ADVANTAGES

- Power Supplies
- Voltage Multipliers
- Data Isolation
- Surge Protection
- Industrial Control Circuits
- Custom Applications

T-SERIES 200°C & 250°C

Johanson also offers two different series of high temperature radial leaded capacitors for 200°C and 250°C. These components feature rugged premolded cases with Hi-Temp epoxy fill. The 200°C line is offered in voltage ratings of 25V to 4KV and maximum capacitance loss of -0.5% in NPO and -45% in X7R. The 250°C line is offered in voltage ratings of 50V & 100V with maximum capacitance loss of -1.5% in NPO and -55% in X7R. Please visit our website for complete component selection & specifications

APPLICATIONS

- Oil Well Logging (Downhole)
- Geophysical Probes
- Jet Engine Controls

NOTE: Lead lengths are typically 1.25" for orders in bulk packaging. Leads are typically 1.00" for tape and reel packaging. Tape and reel packaging comes in 1000 piece reels.

PLANAR CAPACITOR ARRAYS FOR EMI FILTERING

Johanson Dielectrics is the premier supplier of Planar Capacitor EMI Filter Arrays to the Filtered Connector Industry.

Planar Capacitors are the fundamental building block for filtered connectors in Aerospace, Biomedical, Military, Satellite, Industrial and Communication electronics.

Johanson offers high value Arrays in standard and custom solutions to fit your needs.

CIRCULAR ARRAYS

| PHYSICAL LAYOUT | DIELECTRIC MATERIAL | AVAILABLE CAPACITANCE | WORKING VOLTAGE | DWV VOLTAGE |
|--|---------------------|-----------------------|-----------------|-----------------|
| MIL-1560 MIL-1554 MIL-1669 MIL-1651 MIL-1698 MIL-33702 MIL-AUDIO | X7R & NPO | 47 pF to 800 nF | Up to 2,000 VDC | Up to 3,000 VDC |

RECTANGULAR ARRAYS (ARINC 404/600)

| PHYSICAL LAYOUT | DIELECTRIC MATERIAL | AVAILABLE CAPACITANCE | WORKING VOLTAGE | DWV VOLTAGE |
|-----------------------------|---------------------|-----------------------|-----------------|-----------------|
| AR-010 Through AR-150 | X7R & NPO | 47 pF to 940 nF | Up to 1,330 VDC | Up to 2,000 VDC |

D-SUBMINATURE RECTANGULAR ARRAYS

| PHYSICAL LAYOUT | DIELECTRIC MATERIAL | AVAILABLE CAPACITANCE | WORKING VOLTAGE | DWV VOLTAGE |
|-----------------|---------------------|-----------------------|-----------------|-------------|
| Full Size | X7R & NPO | 47pF - 210nF | ≤ 2,400 | ≤ 3,600 |
| Mini-D | | 47pF - 100nF | ≤ 1,000 | ≤ 1,500 |
| Micro-D | | 47pF - 22.5nF | ≤ 680 | ≤ 1,020 |
| Nano-D | | 47pF - 3.0nF | ≤ 200 | ≤ 500 |
| Combo-D | | 47pF - 6.0nF | ≤ 800 | ≤ 1,200 |
| Power-D | | 47pF - 120nF | ≤ 680 | ≤ 1,020 |
| Special | | 47pF - 50nF | ≤ 300 | ≤ 750 |

PLANAR CAPACITOR ARRAYS FOR EMI FILTERING

CUSTOM ARRAYS

Johanson Dielectrics's design expertise and CNC manufacturing process enable broad custom array capability. Many shapes, configurations and geometries are possible. Share your requirements and we will create a solution!

DISCOIDAL CAPACITORS

JOHANSON Discoidal Feed-through Capacitors are the functional element in widely used EMI feed-through filters. This capacitor configuration offers very low impedance and inductance. Discoidal capacitors are ideal for by-pass, filtering, coupling, single line EMI/RFI suppression, and high frequency applications.

- Capacitance values from 10 pF to 11.2 μ F
- Test standards and procedures per MIL-STD-202 and MIL-C-123
- Voltage ratings from 50 to 3000 VDC and 50 to 240 VAC
- Low ESR and ESL, non-polar designs

Call us to discuss your special requirements!

| NOMINAL O.D. (IN.) | DIELECTRIC MATERIAL | AVAILABLE CAPACITANCE | INSIDE DIAMETER (IN.) | THICKNESS (IN.) | RATED VOLTAGE |

CAPSTRATE® CAPACITOR SUBSTRATES

Johanson CapStrate® products integrate bulk capacitance into a ceramic substrate eliminating large discrete capacitive components which saves critical space and simplifies the assembly process. Our design and manufacturing expertise in large format, custom geometries provides innovative solutions that economically solve a wide variety of your design challenges.

ADVANTAGES

- Major Size & Weight Reduction
- Fewer Solder Joints
- Lower Assembly Cost
- Circuit Assembly Available

KEY FEATURES

- Integrated Capacitance in The Substrate
- Rated Working Voltages from 50V to 5,000V
- Temperature ranges: -55C to 125C (specials to 200C and 250C)
- Compact Designs Utilizing Military Grade Ceramics
- Custom Sizes, Values, and Voltages Available

SIZE / CAPACITANCE CAPABILITY EXAMPLES

This chart is intended to provide capability examples. Not all possibilities are shown and we invite application specific inquiries. Circular CapStrate® example lists available capacitance per area.

CUSTOM CAPACITOR SOLUTIONS

Johanson's extensive experience in design and manufacture of large format, custom geometries allows us to develop unique and innovative solutions which successfully solve a wide variety of our customer's design challenges. We'll work pro actively with you to fully understand your requirements and recommend the best solution possible.

KEY FEATURES

- Custom shapes to fit specific requirements
- Multiple capacitors in a single assembly
- NPO/COG and X7R solutions from -55C to +125C
- Multiple pin, lead-frame, and flying wire options
- Bare ceramic, epoxy coated, potted solutions

VARIABLE PITCH ASSEMBLIES

Another custom approach is our variable pitch design. No longer are you limited to a vendor's standard catalogue offering or only square or rectangular custom designs. We let you become your own capacitor designer by not only telling us the desired capacitance and voltage, but also the size, shape, and location of leads! This process helps insure that the resulting capacitor satisfies every aspect of your design requirements.

CAPACITOR PACKAGING

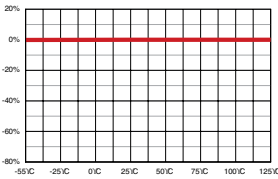

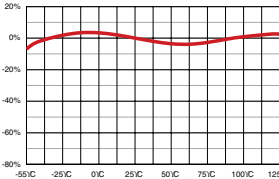

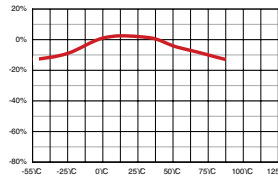

Johanson capacitors are available taped per EIA standard 481. Tape options include 7" and 13" diameter reels. Johanson uses high quality, dust free, punched 8mm paper tape and plastic embossed 8mm tape for thicker MLCCs. Quantity per reel ranges are listed in the tables below and are dependent on chip thickness.

| COMPONENT | 7" DIAMETER REEL | | | | 13" DIAMETER REEL | | | |
|-----------------|------------------|------------------|---------------|-------|-------------------|------------------|---------------|-------|
| | REEL QTY | TAPE TYPE | WIDTH / PITCH | CODE | REEL QTY | TAPE TYPE | WIDTH / PITCH | CODE |
